So, I was trying to make my lineup for the Illini, and unfortunately, the lineups take a while to load up. It was working perfectly with the MLB.

At least on mobile, after scouting your own players, when you leave the page, the roster fills out with their fuzzied grades again and their "real" grades only refresh after clicking on their names.

Is this on roster view?

Not necessarily, it's under gameplan. And in fact, nothing shows up.

Once you set your recruiting board and save points, you cannot go back and change a guy to 0 points - it resets to however many you had. The best you can do is set them to 1, freeing up the other points.

Redshirt function currently opens a contract renewal screen instead of applying the redshirt

In my case I can change a player's points to 1, but I cannot allocate those points to a new player. If I try, it gives me a "Player XXXXX: Exceeds weekly budget" error and will not allow the new player to get those points.

Team won a game despite pitchers only pitching 8.2 innings

College pitchers may be pitching less innings because of less stamina relative to MLB

I currently have no standings shown on my dashboard for CBL. It says "No standings available."

This Week: 0 pts

Total Invested: 0 pts

Interest: High

Competitors:

NT

Committed to STBK in week 4

Henry Ramos

★★★★★

#304

Pos

—

60

Very High

Signed to STBK

Teams (mainly AI small teams) are getting recruits with barely any points and not showing up as a competitor during the recruiting process. Henry Ramos for example was down to his top 3 then chose a random ai team with half the points as the actual top 3 teams.

Please make the 'Commitments' table sortable. It defaults to sorting by Week Committed. I wanna see all the 5 stars that have committed on top.

Some feedback on recruiting:

- Being able to see how far along a recruit is in their recruiting from the Overview view.
- Being able to see which teams are recruiting which recruits without needing to add the recruit to their board.
- For the competitors view on the recruiting board, is there a way to filter out the teams that aren't in contention?

How does pitching stamina work, specifically for college baseball? With 3 games a week I have designated 3 starting pitchers, as a weeks rest should be enough, yet in my most recent series only 1 of those pitchers started a game.
