Once you save a pitching rotation you can't go back to not having a rotation configured for any rotation larger than a one man rotation. Says "Failed to save: duplicate player_id: 0" when trying to have more than one blank spot in a rotation.

Players placed on waivers don't have a player card pop up for them.

1

how much other teams putting on players because it updates every time a user saves and reloads the page and will only show teams within a certain point threshold of the leader

Would like to see a few quick links on each team's page. Something that can take me to gameplan or team roster instead of using the hamburger menu.

There doesn't seem to be any way to see a pitchers hitting potentials, and you can only see their hitting attributes from gameplan pages.

Add a way to see how much of a player you have scouted on the "My Board" and "My Commitments" pages for CBL recruiting.

Players put on IR still count against roster size, so if you had a full roster and made a move to bring up a replacement you get the "Over limit" warning.

Reply

Quote

 **Minnow** 

Apr 21, 2026, 01:46 PM

When viewing a player from the box score exiting out of player profile exits out of entire box score. does not matter if you hit close or the 'x' icon in the top right.

Minnow

Apr 21, 2026, 01:57 PM (edited by Minnow)

Can we have handedness readily available on the roster page, so we dont have to click on every profile to find out who our left handed pitchers are?

Players put on IR still count against roster size, so if you had a full roster and made a move to bring up a replacement you get the "Over limit" warning.

I was just going to say that, thanks for pointing that out.

Would like to get game result exports to CSV to work on rankings.

Ideally you would be able to do it on your team's schedule page, and for each week you can export the results. Or if you selected 'all teams' it would do the same for all the teams together. Nothing huge, just a few datapoints...

game_id, season, home_team_name, away_team_name, venue, home_runs, away_runs, home_at_bats, away_at_bats, home_hits, away_hits, home_doubles, away_doubles, home_triples, away_triples, home_home_runs, away_home_runs, home_walks, away_walks, home_hit_by_pitch, away_hit_by_pitch, home_strikeouts, away_strikeouts, home_sacrifice_flies, away_sacrifice_flies, home_innings_pitched, away_innings_pitched, home_earned_runs, away_earned_runs

Under the starting rotation, it shows Next starter as Slot 6, even though Seattle is running a 5-man rotation. For game 1 of our last series, one of our middle relievers (Pryor Hines)

EDIT: If it matters, I don't see any new injuries to any pitchers on our club. Unless there are injuries that last only for a game that don't show up on the injury report, I don't see anything that would cause a starter to get skipped.

Add a way to set backups for positions. Currently you can't designate a player as an injury replacement or backup so including them in your gameplan means that they have a chance to start but not including them gives the AI complete control of the lineup.

May 1, 2026, 08:24 AM

Moved CWS position player Logan Hill to IR, then moved him to Unassigned.

Couldn't see the status of his injury, so under unassigned I activated him and he has disappeared - not on any roster that I can find/see.

You can see Gerry Castro and Douglas Vargas changes OVR. Seems to happen after you open up a player's card and then go to the Statistics tab.

Steps to reproduce:

- 1. Open SimCBL Roster
- 2. Select a player to open their player card
- 3. Open Statistics tab on player card
- 4. Close player card
- 5. Player OVR changes after 2-3 seconds

Noticing a recent trend where pitchers are slotting-in at DH despite having depth there, after players slot in for exhausted position-players at random positions despite also having utility options as depth.

First observed during Week 7C and made some (successful) adjustments in Week 8 to prevent the seemingly-randomized shuffle, but it occurred again in Weeks 9B and 9C.

Curious to hear if anyone else has noticed something similar and any fixes folks have implemented to prevent random lineup shuffling.

Wins are not properly calculated in the sim. A win condition can only be issued to a starting pitcher when they have gone 5 or more innings. In this box score we see the issue at hand. The starter should not have gotten the win, as they did not pitch the full 5 innings to qualify for a win. In this instance it would go down as a No Decision. The holds albeit weird is correct and so is the save accreditation.

 COL Pitching

	Pitcher	Dec	IP	H	R	ER	BB	SO	HR	PC	B-S
SP	Garry Griffin	W	2.2	6	4	4	1	3	1	57	18-39

	Totals		9.0	9	4	4	1	8	1	129	44-85

May 15, 2026, 05:39 PM

Lineups with pitchers included in batting slots just simply aren't working. Even with force start selected and weight distribution set to 10. Only appears that they work in DH.
